Vibhuti Seth

Jaipur, Rajasthan

8839937211 — vibhutiseth356@gmail.com — LinkedIn — GitHub

Career Objective

Computer Science undergraduate with a strong foundation in C, C++, Data Structures and Algorithms, and core CS concepts. Passionate about problem-solving and software development, seeking a Software Engineering Internship to apply technical skills, build efficient software solutions, and contribute to real-world projects while gaining industry experience.

Education

B.Tech – Computer Science Engineering 2024 – 2028
JK Lakshmipat University, Jaipur
CGPA: 7.8 (Till Semester 4)

Senior Secondary (Class XII, CBSE) 2024
Olympus High Senior Secondary School

Technical Skills

Programming Languages: C, C++
Data Structures & Algorithms: DSA
Web Development: HTML, CSS, JavaScript, React, Node.js
Databases: SQL (MySQL)
Core CS: DBMS, Operating Systems
Tools: Git, GitHub, VS Code, Linux

Experience

Anytime Invest
IT / AI Intern May 2026 – July 2026

- Gained practical exposure to the role of technology in the fintech industry and understood end-to-end organizational data workflows.
- Worked with concepts related to data collection, data ingestion, data engineering, data analytics, and AI-driven solutions.
- Worked on Databricks for data processing and analysis.
- Worked on data processing, data transformation, data cleaning, and data preparation for analytics.
- Learned Prompt Engineering concepts for AI-based applications.
- Worked with APIs using Postman , understanding API requests, responses, data retrieval, and integration workflows.
- Developed an understanding of data warehousing concepts and the workflow between developers, data engineers, data analysts, and AI engineers.

Projects

QuickFix+
GitHub Repository: https://github.com/vibhuti387/QuickfixPlus.git

- Developed a web-based platform providing quick solutions for everyday service-related issues.
- Designed clean UI and implemented backend logic using Python.

Nayi Shuruwaat
GitHub Repository: https://github.com/vibhuti387/NayiShuruat.git

- Social-impact platform aimed at supporting widows through skill-based work opportunities.
- Focused on user-friendly design and sustainable income generation model.

AI-Based Crop Price Forecasting & Market Advisory System
Python, Machine Learning

- Developed a machine learning-based forecasting system using historical mandi data to predict crop prices and support data-driven agricultural decisions.

- Implemented and evaluated Linear Regression, Support Vector Regression (SVR), Random Forest, and XGBoost models for crop price prediction.
- Achieved an R^2 score of 0.92 on the evaluated dataset, demonstrating strong predictive performance.
- Designed a decision-support system providing Sell, Hold, or Wait recommendations based on predicted prices to assist farmers with market timing.

SkillProof AI

GitHub Repository: https://github.com/vibhuti387/SkillProof.git

- Blockchain-based AI-verified resume builder designed to enhance trust and authenticity in hiring.
- The system takes structured inputs from users regarding their skills, projects, and experiences.
- Assesses the skills using AI-based evaluation and generates a professionally formatted resume template.
- Applied ML fundamentals, Web3, and problem-solving techniques for scalability.

Achievements & Certifications

Database Management Systems (DBMS) Certification – Infosys Springboard

View Certificate

- Completed structured training covering SQL, normalization, ER models, and database design principles.

CodeChef Competitive Programming

Profile link

- Current Rating: 1013.
- Regularly solve algorithmic and data structure problems to improve logical thinking and coding efficiency.

LeetCode – Problem Solving

Profile link

- Solved 60+ Data Structures and Algorithms problems on LeetCode with consistent practice.

LNM Hacks Hackathon

verification

- Participated in LNM Hacks, collaborating in a team environment to develop innovative solutions within limited time.
